Associate in Applied Science   to   Any UAGC Bachelor of Arts Degree
Artificial Intelligence and Machine Learning (3891)

Pending receipt and evaluation of official transcripts, this program to program transfer pathway is unofficial; does not guarantee automatic acceptance of transfer credits; and is based solely on Maricopa County Community College District coursework with a grade of C- or better. Maricopa may require a different grade for successful completion. The University of Arizona Global Campus (UAGC) course applicability and availability to take additional coursework beyond the designated Maricopa degree will vary based on each student's individual transfer credit situation. We recommend students work with their UAGC Academic Advisor during their first UAGC course to ensure duplicative coursework is not scheduled pending their official transfer credit evaluation. For complete degree, residency, and transfer credit policies, please refer to the UAGC catalog. **This UAGC program is not designed to meet the state educational requirements for a specific professional license or certification in any state.**

UAGC Emphases
Emphases offered in the online modality provide students with additional opportunities to broaden and enrich their education that is distinct from and enhances a student's bachelor's program. It may be taken as a way to give a coherent pattern to elective credits, to expand career options, to prepare for graduate study, or simply to explore in greater depth an area different from one's major. An area of emphasis may be added to any UAGC bachelor's degree.

The following emphases include UAGC AIS coursework:
- Artificial Intelligence (12 credits)
- Healthcare Management (12 credits)
